Skills

Cloud Platform
AWS, Azure, E2E

DevOps Skills
Linux, Docker, Ansible, Jenkins, Git, Gitlab, Bash Scripting

Web Servers
Nginx, HTTPD, Apache2

Databases
MySql, MongoDB, PostgreSql

Load Balancer
HAproxy, Nginx, ELB

Monitoring Tools
EL(F)K Stack, Prometheus, Grafana

Caching Tools
Redis, Memcached

Interests

Professional Interests:
DevOps & Infrastructure Automation

Languages

English

Hindi

Summary

Experienced Cloud Operations Engineer with a strong foundation as a Linux System Administrator, currently working at Netzary Infodynamics.

Experience

Netzary Infodynamics Bangalore
CloudOps Engineer
As a Cloud Operations Engineer, I play a pivotal role in optimizing cloud infrastructure for performance, security, and scalability. My expertise in DevOps practices, monitoring tools, and database management helps maintain a robust and reliable cloud environment. By leveraging automation, proactive monitoring, and efficient database management, I ensure smooth operations and high availability of critical systems.

Projects

Highly Available Web Application Infrastructure on AWS (Microservices + CI/CD)

⇒ **Description**:
* Designed and deployed a fault-tolerant microservices-based web application on AWS using Linux, ensuring high availability and scalability.

* Implemented HAProxy load balancing across multiple Django application servers, improving performance and reliability.

* Configured Nginx to serve static content, reducing backend load and improving page load times.

* Set up MySQL master–slave replication with failover to maintain data integrity and database availability.

* Integrated Redis caching to minimize database queries and enhance application response time.

* Automated code synchronization using lsyncd, eliminating deployment inconsistencies.

* Built an end-to-end CI/CD pipeline using Jenkins and deployed services on AWS EKS (Kubernetes) with auto-scaling.

* Provisioned infrastructure using Terraform and implemented monitoring with Prometheus and Grafana.

Technologies: AWS, EKS (Kubernetes), Jenkins, Terraform, HAProxy, Nginx, Django, MySQL, Redis, lsyncd, Prometheus, Grafana, Linux

Education

North Maharashtra University (NMU) Bachelor of Engineering • CGPA: 8.23
2021 – 2024
Civil Engineering
